

Wirral young (at heart) practitioners

Wirral practitioners have been working for several years to provide an informal, friendly organization for continuing education.

Wirral non-principals group

This group exists to help non-principal GPs around the wirral, with educational and supportive meetings.

www.wirralgp.org.uk

This website has been set up to act as a resource for all GPs on the wirral. In particular the non-principal, sessional, retainer, flexible careers, and salaried GPs.

The locum list is a place to find out about GPs who are available and to advertise your wirral vacancies.

11th July 2006
Thornton Hall Hotel

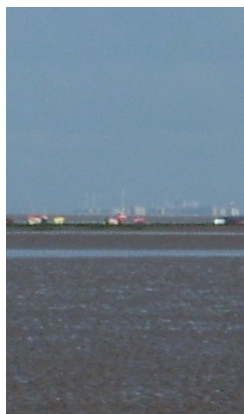

Wirral young at heart practitioners and wirral non-principals group.

Dr Patrick Milroy

- GP in Frodsham
- Medical adviser to the Amateur Athletics Association of England and to Runners World
- Team doctor and medical adviser to the Commonwealth Games
- Qualified in 1971 at Manchester

Boats on the Dee

Sports Medicine

This is an important and interesting area of primary care. Whilst the image first conjured up may be of millionaire footballers or Olympian medalists, many ordinary patients have musculoskeletal conditions whose treatment can be informed by Sports medicine concepts.

The aims of the BASEM are to promote and study methods for the protection and improvement of public health and fitness amongst members of the public participating in sporting, recreational and other leisure-time activities.

Tread carefully

BASEM also endeavours to promote research into the causation and treatment of medical problems arising from such activities and into the scientific and psychological aspects of athletic and sporting achievement.
